Munzer Mardini

Frontend & Mobile Engineer | Tech Lead

Damascus, Syria | +963 943 307 059 | munzerx@gmail.com | linkedin.com/in/munzer-mardini | github.com/munzerx

Summary

Frontend and mobile engineer with 5+ years of experience building and shipping production web and mobile applications with React, Next.js and React Native. Led a 6-person cross-functional team (frontend, backend, QA, DevOps) from client requirements to launch, then owned the product end-to-end as its sole engineer. Delivers full-stack features with Node.js/NestJS and Laravel using AI-assisted development. Experienced with bilingual Arabic/English (RTL) products, third-party integrations, and working directly with clients and business stakeholders.

Experience

WeGotNerds (formerly SEMByNerds) Damascus, Syria | May 2021 – Present

Software outsourcing company; rebranded from an SEO/SEM agency in 2024 when it moved to outsourcing.

Frontend & Mobile Engineer / Tech Lead *2024 – Present*

- Deliver client web and mobile products end-to-end, from requirements and estimation through implementation, testing, deployment and maintenance — as a team lead, team member or solo engineer.
- Lead teams of 2–6 developers: task planning, code review, technical direction and release coordination.
- Build mobile apps with React Native and Expo, including authentication, API integration, state management, offline handling, push notifications and production builds for iOS and Android.
- Integrate third-party services for authentication, payments, notifications and analytics.
- Build bilingual Arabic/English applications with full RTL support across web dashboards and mobile apps.
- Work directly with clients and operations teams to turn business requirements into production features.

TapNTray | multi-tenant B2B SaaS for café operations

React, React Native, Expo, NestJS, Prisma, PostgreSQL, GraphQL

- Gathered requirements directly with the client and turned them into scope, milestones and tasks.
- Led a 6-person team (2 frontend, 2 backend, 1 QA, 1 DevOps) for 6 months through to launch; then became the sole engineer, owning frontend, mobile, backend and releases.
- Platform of 3 admin dashboards and 2 mobile apps (employee and runner): order management, subscription logic, role-based access control, delivery tracking, notifications and operational workflows.

WeGotNerds HR Platform | internal HR and people-management system

React, NestJS

- Designed and built the company's in-house HR platform, used by more than 30 employees.
- Employee self-service: leave balances and requests, holidays, company calendar, policies, payroll and salary history, and employment details.
- Manager tools: team attendance tracking and leave approvals.

Time-Tracking Platform | internal replacement for Clockify

React, NestJS

- Built an in-house time-tracking tool to replace the paid Clockify subscription, saving more than $1,200 per year.
- [Key features, e.g. timers, projects/clients, timesheets, reports and exports.]

Wodex.online | parcel-delivery platform

React, Laravel, PostgreSQL, Tailwind CSS

- Defined the MVP and led a 3-person team from concept to launch across the web app, APIs and product workflows.

Ecomundo.eu | e-commerce platform

- Led a team of 5 to launch and maintain the platform, coordinating frontend work and prioritizing UX and technical improvements.

Ideal Ways | B2B wholesale platform for a Saudi toy distributor

WooCommerce

- Built supplier catalog import, business account types, company billing requirements, wholesale checkout, additional-item inquiries and email-gated business account verification.

Xinhuaage.com | B2B trading platform

Next.js

- Took features from requirements through implementation and deployment.

ThingsBoard IoT Dashboard | device monitoring

ThingsBoard, HTML, CSS, JS

- Built a custom dashboard giving real-time visibility into connected devices, readings and online/offline status.

CL-ToDo | worker task-management mobile app

React Native, Expo, PHP

- Owned app architecture, feature implementation, API integration and state management.

Kemmicollection.com | e-commerce store

Shopify

- Developed and delivered the store while coordinating frontend development.

Frontend Engineer & SEO Specialist *May 2021 – 2024*

- Built a website-analytics dashboard in Vue.js for auditing client websites.
- Built and maintained client websites in Webflow.
- Set up and optimized Google Business Profiles and improved on-page and technical SEO for client websites.
